OBJECTIVE

MCA student focused on Blockchain Systems, LLM Fine-Tuning, and AI-driven applications. Experienced in deploying production crypto assets on Solana and optimizing large language models using parameter-efficient techniques (QLoRA, PEFT). Passionate about building scalable, real-world AI and Web3 solutions.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Siddaganga Institute of Technology, Tumakuru

Bachelor of Computer Applications (BCA)

2022 – 2024

Seshadripuram Degree College, Tumakuru | CGPA: 8.2/10

PROJECTS

FOSS Coin – SPL Token on Solana Blockchain

2025

Public Ledger: [Click here](#) || Live trading: [Click here](#)

- Developed and deployed a production-ready SPL token on Solana with live trading on Orca DEX.
- Established a liquidity pool enabling real-time decentralized trading and price discovery.
- Implemented transparent tokenomics with on-chain verification via Solscan.
- Managed deployment, smart contract interaction, and Web3 integration.

Technologies: Solana, SPL Token, Rust, Web3.js, Orca DEX, DeFi

Fine-Tuning Large Language Model – Thoshan Flash

2024

Model: [Click here](#)

- **Achieved 26+ downloads** within 1st month of public release on Hugging Face platform
- Fine-tuned Gemma-2-9B using QLoRA and PEFT for parameter-efficient training.
- Implemented 4-bit quantization reducing memory usage from 36GB to 12GB.
- Deployed interactive Gradio interface for real-time inference and public testing.

Technologies: Python, Hugging Face, PEFT, Unsloth, PyTorch, QLoRA, Gradio

Decentralized Insurance Claim D-App

2023

Live: [Click Here](#)

- Built Ethereum-based smart contract system for automated insurance claim processing.
- Integrated MetaMask for secure wallet authentication and transaction signing.
- Deployed on Ethereum testnet with full frontend-to-blockchain integration.

Technologies: Solidity, Truffle, Web3.js, Ganache, MetaMask, React

Home Wi-Fi Router with Network-wide Ad Blocking

- Blocks advertisement on TV mobile, pc, Youtube and any OTP platform
- Deployed Pi-hole DNS server for network-wide ad filtering privacy protection
- Configured custom DNS, DHCP, and routing

2024

TECHNICAL SKILLS

Languages: Python, JavaScript, Solidity, Rust

Frameworks: Hugging Face Transformers

Blockchain: Solana (SPL), Ethereum, Smart Contracts, Web3.js, Truffle

AI/ML: PEFT, QLoRA, Unsloth, PyTorch, Gradio

Systems & DevOps: Git, Docker, Linux, NixOS, Vim, Tmux

Databases: ChromaDB

Networking & Security: DNS Configuration, SPF, DKIM, DMARC, VPN Setup

CERTIFICATIONS

- Linux Fundamentals | Certificate of Completion in Linux System Administration and Networking
- CS50's Introduction to Cybersecurity | Harvard University (Ongoing)

ACHIEVEMENTS

- Yoga Ratna Award | Central Government of India (2018) | National-level recognition for excellence in yoga
- Co-founder & President, Debate Society (Deb'Soc) | Seshadripuram Degree College (2023) | Founded and led a 60–80 member debate community; initiative continues under junior leadership
- Elected Event Lead, Zerone 2.0 | Siddaganga Institute of Technology (SIT), Tumakuru | Won campus-wide election and led an 80-member organizing team for the institute's flagship annual technical event

Hackathon

- NMIT College | 24-Hour Web3 Hackathon (2024) | Developed decentralized web application prototype
- 24-Hour Rapid Build Challenge (2025) | Built a privacy-focused e-commerce prototype deployed on Tor network live in darkweb
- AI Systems Hackathon (2025) | Designed and implemented multi-agent autonomous system to automate complex workflows
